NEW PRODUCT

NEW Monoblock GMV115

The GMV115 is a single spool monoblock directional control valve combined with a integrated pressure compensated flow regolator.
The relief valve is working on ports A & B and is connected to the compensator spool and when the pressure setting is reached the oil dumps to the centre gallery.
Is also available GMV115 with the maximum flow A and adjusted in B.
If a HPCO is installed for the use of down stream valves a second pressure relief valve is required to control the pressure out from the HPCO in the centre gallery
The two relief valves are working independent of each other.

AVAILABLE OPTIONS

- *Full Flow electrical Dump Valve (DV)*
- *Hi Pressure Carry Over (HPCO including extra relief valve)*
- *Carry Over (CO)*
- *Motor spool code 111*

TECHNICAL DATA

Max working pressure : 320 bar/4700 psi
Nominal Flow: 115l/min / 30 US GPM

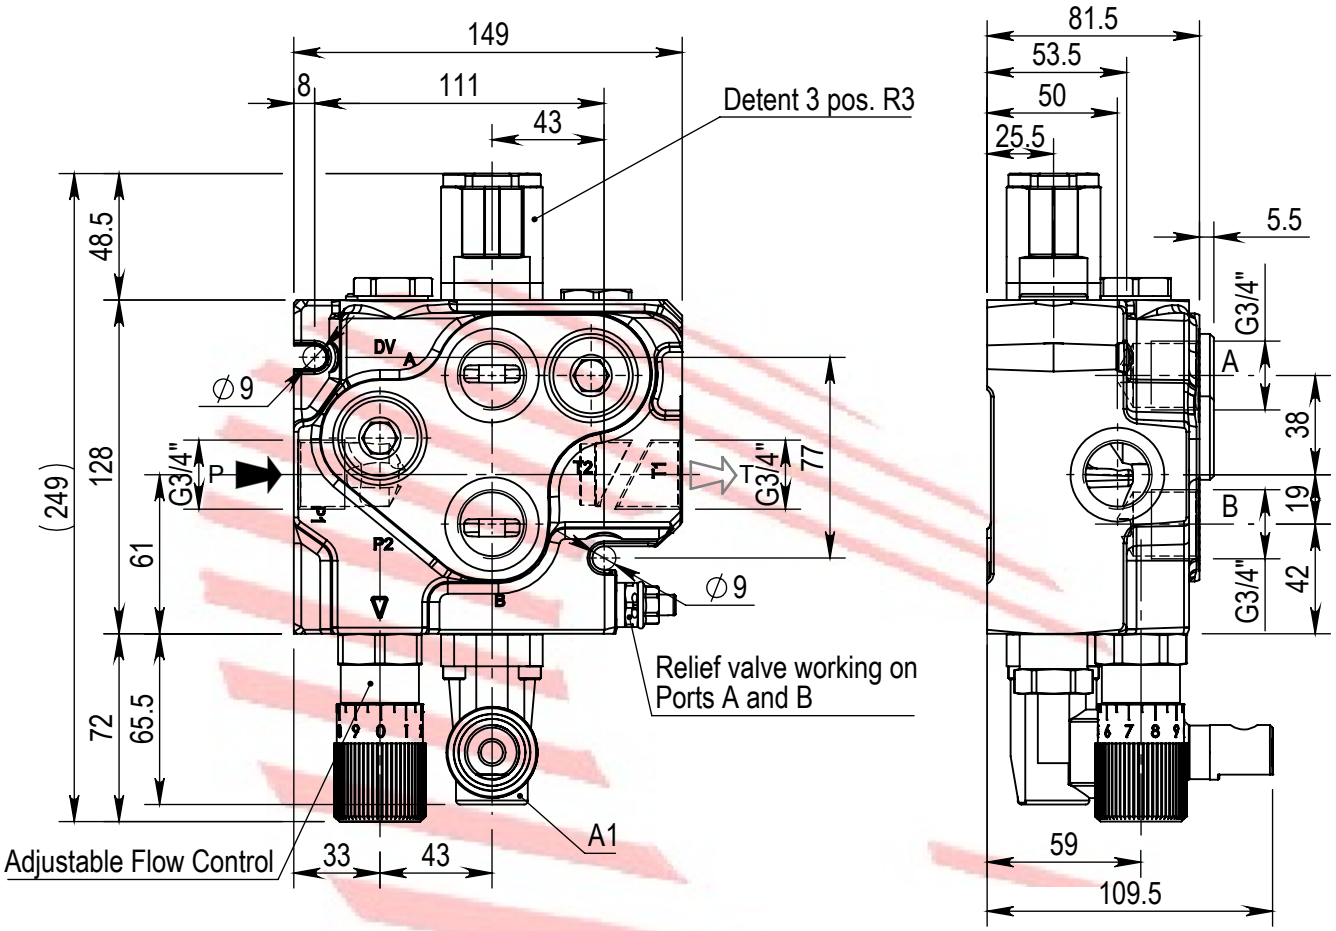

AVAILABLE THREAD

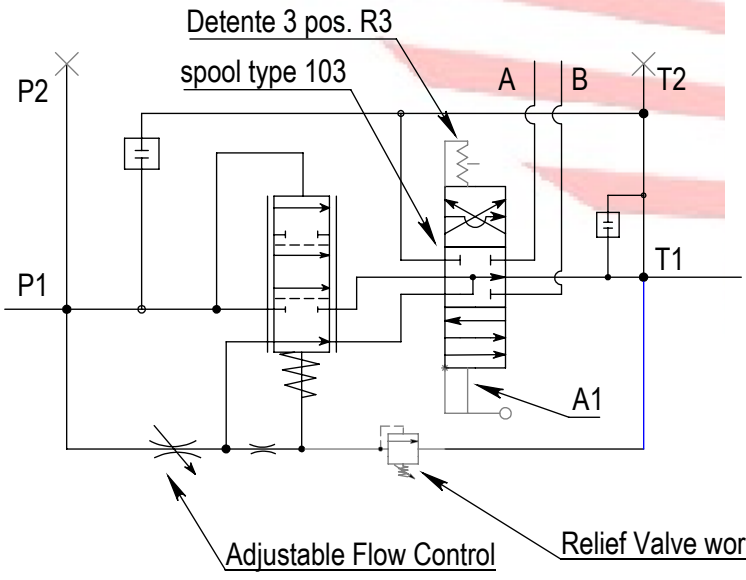

Inlet ports P1 , P2 : G3/4" / 1"1/16-12UN(SAE12)
Work ports A and B: G3/4" / 1"1/16-12UN(SAE12)
Outlet ports T1 and T2: G3/4" /1"1/16-12UN(SAE12)
